HALLMARK FLOORS

CORPORATE / HOSPITALITY

3TWENTY, OCEANSIDE OAK

CORPORATE / HOSPITALITY

Today businesses are striving to create a workplace culture that is welcoming and even more fun for both its employees and visitors. Creating an interior work environment that incorporates natural elements has been proven to dramatically improve productivity and mood. Hallmark's hardwoods and Teragren bamboo floors are an ideal option for evoking a company's culture and branding for its employees and visitors. From the individual office rooms, lobbies, common areas, and beyond, our flooring can be the difference maker in your next corporate project.

An important consideration when choosing commercial hardwood flooring is the finish, (surface treatment). There are two different finishes for hardwood: Glaze Tek polyurethane, and Nu Oil®. Each finish will provide a different purpose and fashion. Larger hotels and corporate facilities would most likely use a polyurethane wood coating, like Glaze Tek

hardwood finish, where boutiques, smaller hotels could use either polyurethane or Nu Oil® finish. Nu Oil® is a hybrid durable oil finish that provides a very low sheen and reveals the natural grain of the hardwood and in most cases more than polyurethane.

REGATTA, LEEWARD OAK

ALTA VISTA, MALIBU OAK

Creating an interior work environment that incorporates natural elements has been proven to dramatically improve one's productivity and mood.

See installation matrix on last page for types of corporate flooring we offer along with recommendations for the best choice for each type of space.
