HALLMARK FLOORS

HEALTHCARE

Confidence and comfort are integral to a patient's healthcare experience. Hygienic demands and durability need not be the only factors when selecting flooring for a healthcare environment project. Hallmark's vast collection of attractive and resilient flooring will leave a lasting impression on patients and contribute to the quality of their healthcare experience.

Flooring contributes to a visitor's first impression of a healthcare facility and directly impacts a patient's experience. The lobby or waiting room area, for instance, is what the patient sees first, setting the tone for the entire patient experience. The right floor directly contributes to a welcoming, professional and pleasing experience. When selecting a floor for a healthcare project, safety, sterility and

environmentally conscious products are vital. Whether a lobby, patient room, or recovery space, optimal cleanliness and aesthetics can be achieved with a variety Hallmark flooring options. Our healthcare flooring solutions are designed with patients in mind, creating a personalized and aesthetically pleasing environment promoting wellness and comfort.

VOYAGER, COLLINS CHERRY & ADRIN MAPLE

Studies in evidence-based design show that a patient's surroundings have a major impact on outcomes. In other words, the treatment and healing environment directly correspond with patient recovery rate.

Floors that create a healing environment

Medical studies show that single-patient rooms, noise-absorbing floors and lighting help patients get home sooner. Our floors help reduce the noise level of medical beds and trolleys, as well as footsteps, so that patients can get the rest they need. Our Voyager Collection is the perfect PVC-free

choice for projects requiring completely aseptic environments. Any of our resilient flooring collections such as Times Square, 3TWENTY or 2TWELVE provide a nurturing, natural aesthetic to promote healing and wellbeing for patients.

See installation matrix on last page for types of healthcare flooring we offer along with recommendations for the best choice for each type of space.
